

The background of the slide is a vibrant, stylized illustration of the Willy Wonka & the Chocolate Factory. The factory is a large, multi-story brick building with numerous windows, some of which are glowing with warm light. Several tall smokestacks are visible, emitting thick plumes of smoke in various colors: purple, yellow, and blue. The sky is a mix of deep blue and orange, suggesting a sunset or sunrise. In the foreground, there are several large, ornate domes with colorful, stained-glass-like patterns. A roller coaster track winds through the scene, and a large, ornate gate stands in the center. The overall atmosphere is whimsical and fantastical.

WILLY WONKA CHOCOLATE FACTORY

The Business Challenge

Turning data challenges into opportunities for growth and profitability

Limited visibility
into product profitability

Need to identify
strongest sales regions

Difficulty optimizing
product strategy

Lack of data-driven
decision making

1. Identify High - Performing Products

2 . Evaluate Regional Sales Performance

3. Drive Data Business Decisions

Research Questions

The key business questions guiding our analysis:

Products → Which products generate the highest revenue and profit?

Regions → Which regions contribute the most sales?

Factories → Which factories perform best?

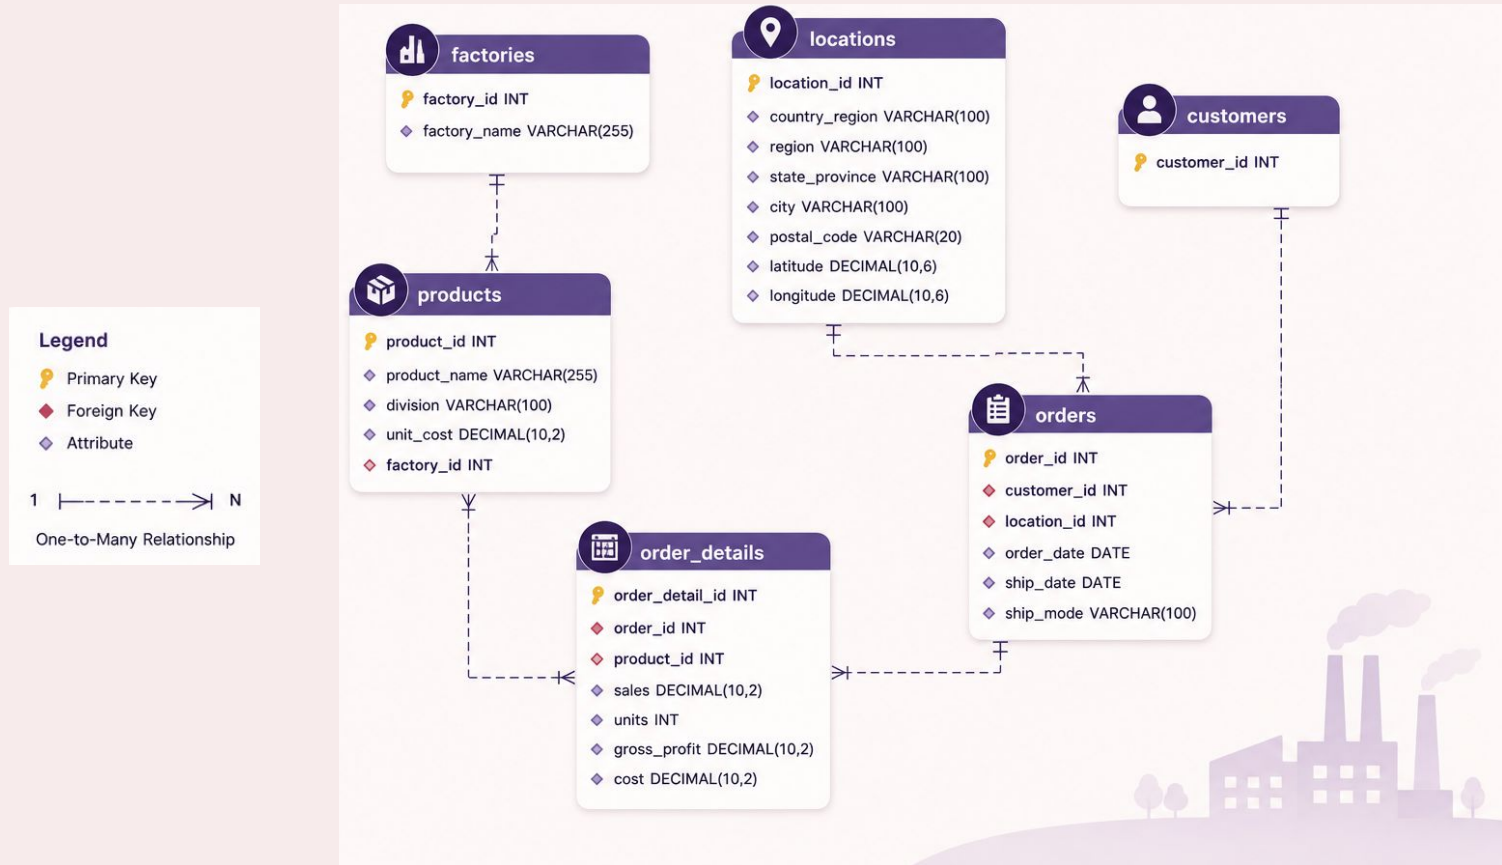

Profitability → Is high revenue always linked to high profit?

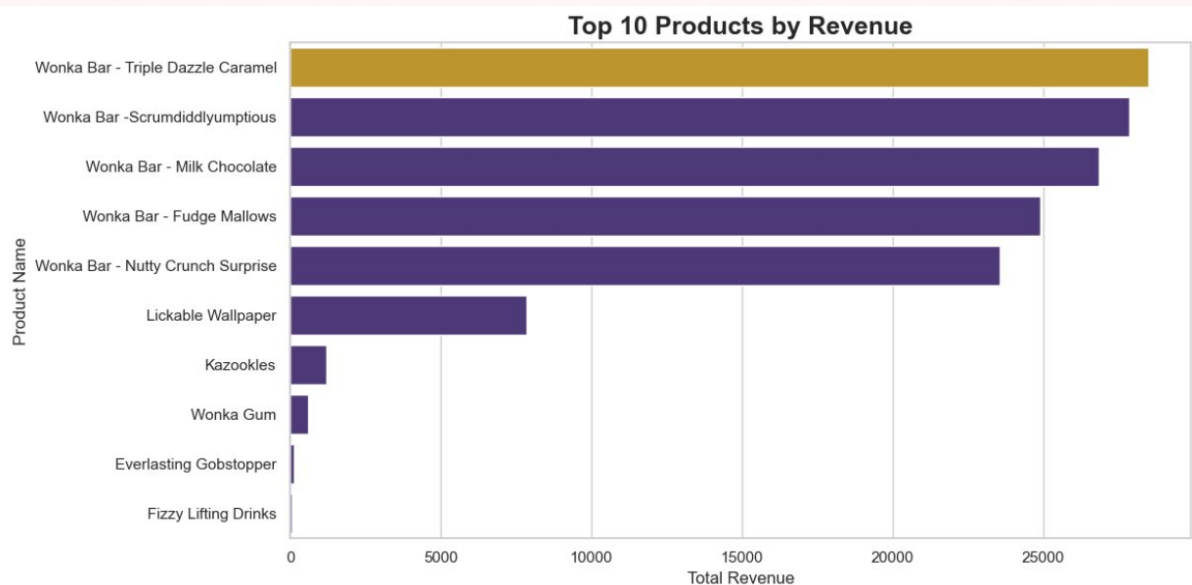

Our goal: Transform data into actionable insights that drive **smarter decisions** and **sustainable growth**.

Database Design

TOP 10 PRODUCTS BY REVENUE

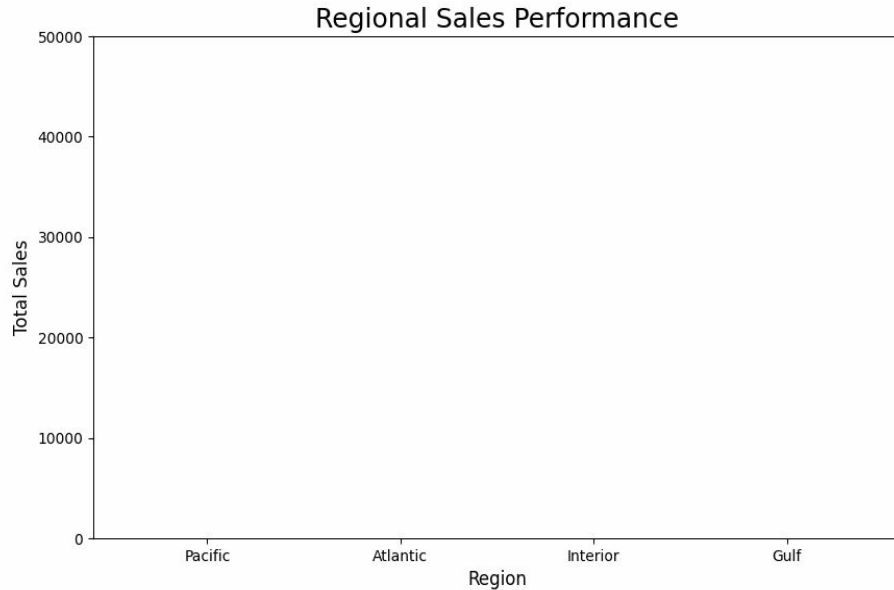

Key Insight

Triple Dazzle Caramel generated the highest revenue, significantly outperforming most products in the portfolio.

Then:

- Prioritize inventory
- Focus promotional efforts
- Leverage high-performing product lines

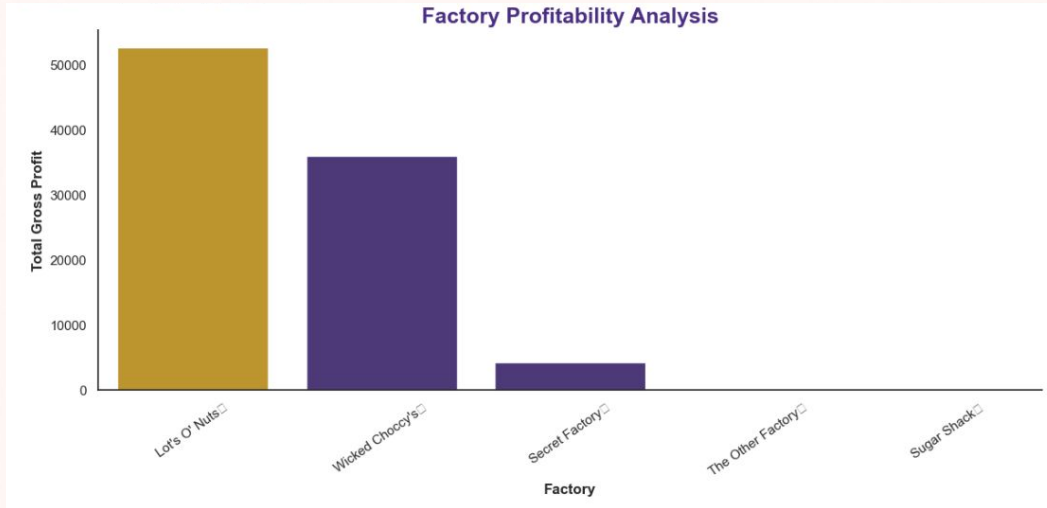

REGIONAL SALES PERFORMANCE

Key Insight

Pacific Region achieved the strongest sales performance.

FACTORY PERFORMANCE

Key Insight

This chart compares factories based on total gross profit.

Factories with lower profitability may require operational review, product mix analysis, or cost-efficiency improvements.

Key Business Insights

TOP PRODUCTS

Wonka Bars generated the highest revenue and profit margins.

BEST FACTORY

Lots O' Nuts factory significantly outperformed other facilities.

REGIONAL PERFORMANCE

A small number of regions concentrated most of the sales activity.

BUSINESS OPPORTUNITY

Data-driven inventory and promotion strategies could increase profitability.

Recommendations

1

Invest in TOP Products

Increase investment in high-performing Wonka Bar products

2

Expand in strong Regions

Expand sales strategies in Pacific and Atlantic regions

3

Optimize Product Portfolio

Reevaluate low-margin products with weaker profitability

4

Improve Forecasting

Use data-driven forecasting for inventory planning
